

PROFILE

I am an experienced software developer well-versed in various aspects of the Information Technology industry. My passion for technology, particularly programming, has been a driving force throughout my career.

Although IT was not offered as a subject in high school, I devoted myself to self-study and pursued admission to a reputable university to further enhance my knowledge and skills in this field.

As I approached the end of my twelfth grade, I received an email from Belgium Campus, informing me of my eligibility to apply to their esteemed college, with the opportunity to commence my studies immediately following high school graduation.

EDUCATION

Highschool Rob Ferreira
2017 - 2021

I went to Rob Ferreira Highschool and graduated in 2021 qualified to go and study for a bachelor's degree or higher. Feel free to summarize your coursework too.].

Belgium Campus
2022 - 2024

In the year 2022, I commenced my studies at Belgium Campus for a three-year Bachelor's Degree in Information Technology. Currently, I am actively involved in my second year at BC. I am proud to announce that I excelled in my first year, achieving distinctions in several modules including Business Management, Database Development, and Web Programming.

WORK EXPERIENCE

My only experience is from Belgium Campus University and self-study.
